

Prelude:

-EKN: we had a great (slow) run-through of this!. Keep up the good work with practicing those tricky spots. If you feel pretty good on a section, make sure you are practicing the dynamics and bow movements/articulations as well. We will keep coming back to this one in rehearsals to work on phrasing, but next week we will mostly focus on Jupiter

-Jupiter: Individually, we have most of the notes/rhythms- now, we have to piece it together. Next rehearsal we will fix the ensemble aspect of each section, and make sure everybody knows exactly how their part fits in. Use the rehearsal numbers to guide your practice. Use a metronome if possible and see that you understand the counting of each measure. Looking at the score while listening to the piece will help! See if you can hear the other parts and how they interact with yours.
